

# Guts

[continued from page 4]

years ago by hydraulic dredging of the channel. A town road through that marsh is contemplated in connection with the dredging of Whale Meadow for boat moorings. That is another subject which concerns the same location.

In a letter dated April 24, 1979 the writer sketched out a words a new system of sewer pipping. It turned out to be approximately what Metcalf and Eddy had proposed, as learned from their summary report at the library. For the main sewer pipe there is a natural route down Beechwood St. into Jacob's Meadow and down to the meadow between the Yacht Club and Whale Meadow. That route would be mostly easy digging with a minimum of ledge. The

plan suggested either Jacobs Meadow, or Whale Meadow, for the treatment plant, but for some reason which the writer cannot clearly explain Jacob's Meadow is ruled out although acceptable for the present treatment plant for a few more years. A better explanation could be supplied by the commissioners.

That leaves Whale Meadow. That has been repeatedly recommended and is believed by the writer to be the correct location. I hope the town will see it that way so that a decision can be made in September, so as to get the sewage matter settled. I hope to study the matter further but I am bothered by being blind and obliged to have everything read to me. It would help if others would review the situation and find out where

the writer is wrong in his conclusions.

It is wished that Metcalf and Eddy and the sewer commissioners would report further to the town and I believe that they are about to do so. It is not to be expected of Metcalf and Eddy that they should conduct a campaign to tell the town what to do. They have a contract listing in detail what they will do for money received. The contract price was \$93,000 of which \$88,394.69 has been paid leaving \$4,605.31 unpaid. There is a complication in respect to step one and step two, discussing them to inform the voters.

The above is the best I can do at this moment. It is hoped that others will speak up and say what they think. There should be enough discussion so that voters will see the situation clearly enough to make up their minds.
